The readings of the Barometer are corrected to 32° Fahrenheit, and mean sea level. The mean temperature of the year, 70·1°, shows an increase over the previous five years. The mean temperature in this and the following tables is deduced from three daily readings of a thermometer in shade, taken at 9 a.m., 3 p.m., and 9 p.m. For further information relative to the Observations taken at Brisbane, see Tables III., VII., VIII., IX., X., XI., XII., XIII.

The large amount here sought to be recovered bears but a small proportion to the amount actually realised; but it must be borne in mind that many of these writs of *fieri facias* were for large amounts, the suitors already holding mortgages over, and being in possession of the property seized, and were merely put in for the purpose of obtaining the Sheriff's title for the conveyance of the interest—the purchase money at sale being nominal.
